Amur Region Digest versions in
Russian, Chinese, and English:

Dear participants and guests of the Eastern Economic Forum!

I am pleased to welcome you to the premier business platform of the Far East. For the Amur Region, the Eastern Economic Forum is not merely an event, but an opportunity to establish itself as a region that is currently setting the pace for economic growth in the macro-region.

RECORDS IN THE ECONOMY AND THE COMMISSIONING OF MAJOR FACILITIES

The average economic growth rate of the Amur Region over the past five years has exceeded the national average. Our key economic indicator — gross regional product — has doubled, reaching 1 trillion 100 billion rubles last year.

We have achieved such high growth rates thanks to the development of the gas-chemical cluster, the launch of new logistics facilities, mineral extraction, and record-breaking performance in agriculture.

Amur Region leads the Far East in attracting investments: over 3 trillion rubles have been invested in its economy over these years. By the end of 2025, we entered the top ten Russian regions in terms of investment attraction, with the volume exceeding 1 trillion rubles.

More than 70 projects are being implemented in the region across priority sectors: logistics, agriculture, petrochemistry, energy, and tourism. Three of these projects are being carried out under the direct instruction of the President of Russia: the Vostochny Cosmodrome, the petrochemical cluster, and the Eastern Polygon Railway.

✦ The Bridge Across the Amur River

The International Road Bridge Across the Amur is of strategic importance to us and opens up great opportunities for cooperation with China.

It became operational in 2022, and the volume of freight traffic grows every year.

At the end of 2024, bus passenger service between Blagoveshchensk and Heihe was launched across the bridge, and this route is actively used by tourists and businesspeople from both countries.

At the end of 2025, we completed the construction of a modern border checkpoint, Kanikurgan, in the bridgehead area, with 16 lanes opened for traffic. Currently, more than 600 freight vehicles can cross the Russia-China border daily, and once the facility reaches full capacity, the figure will amount to 850 vehicles per day.

✦ Blagoveshchensk International Airport Terminal

In April of this year, the new passenger terminal at Blagoveshchensk International Airport was brought into service, with its launch authorised by the President of Russia.

We worked on the development of the airport for several years. A second runway was built, the apron was expanded, and the entire air navigation infrastructure was modernized. Today, our airport is capable of handling all types of aircraft.

Over the past five years, passenger traffic at Blagoveshchensk Airport has more than doubled: in 2019, it handled 440,000 passengers, and in 2025, the millionth passenger was registered for the first time.

✦ Vostochny Cosmodrome

The Vostochny Cosmodrome continues to be actively built and developed. Over the past five years, a second launch complex for heavy-class launch vehicles has been constructed there. In 2024, the Angara A5 rocket was launched from it for the first time, with which Roscosmos associates the future of Russian cosmonautics.

✦ A new sector of the Amur Region economy — petrochemistry

By order of the Russia President, a world-class petrochemical cluster is being established in the Svobodnensky District.

It includes the Amur Gas Processing Plant (Gazprom) and the Amur Gas Chemical Complex (SIBUR). The construction of these innovative facilities has been underway for several years, and these mega-projects are now in their final stretch.

The Amur Gas Processing Plant (AGPP) is one of the world leaders in natural gas processing. It produces methane, ethane, propane, butane, and helium, including for export. The plant is steadily increasing its production volumes.

The Amur Gas Chemical Complex is one of the world's largest facilities for the production of polyethylene and polypropylene. The gas cluster will produce 42 billion cubic metres of gas and 2.7 million tonnes of polymers per year.

Our top priority is to develop polymer processing within the region, which is why an industrial park is being established. This year, production is scheduled to be launched there for packaging film, battery components, polymer pallets, and other products.

Thanks to the creation of the petrochemical cluster, the Amur Region has attracted a significant inflow of investment, gained increased tax revenues, and created new jobs.

✦ The Amur Region is a leader in electricity generation in the Far East

Over the past five years, the number of large-scale power generation facilities in the region has increased. In 2021, the Svobodnenskaya TPP (thermal power plant) with a capacity of 160 megawatts was built. Currently, the second phase of a gas-fired power plant with a capacity of 450 megawatts is under construction.

Construction activities are currently in progress on the Nizhne-Zeyskaya Hydroelectric Power Plant, the fourth HPP in the region.

The region also has great expectations for the development of green energy. Two wind power plants with a total capacity of 400 megawatts are to be built in the Zavitskiy District. A solar power plant with a capacity of over 600 megawatts, which will become the largest in Russia, is to be constructed in the Oktyabrsky District.

✦ Development of the Eastern Railway Network — the Trans-Siberian Railway and the Baikal-Amur Mainline (BAM)

With the shift of the Russian economy to the East, freight traffic along these railways has increased, and their importance has grown manifold. The Amur Region plays a key role, as a quarter of the Eastern Railway Network runs through our territory.

Over the past five years, a large-scale volume of work has been carried out: new tracks and bridges have been built. A significant facility was the Kerak Tunnel on the Trans-Siberian Railway, constructed in the Skovorodino District in 2023.

As a result, the throughput capacity of the Eastern Railway Network reached 180 million tonnes in 2025, and is expected to increase to 270 million tonnes by 2032.

Mining industry

One of the key industries in the region is gold mining. It accounts for one third of the Amur Region's industrial output. In 2025, over 20 tonnes of gold were extracted. Looking ahead, we have several more deposits that will sustain this level of production for decades to come.

Coal production volumes in the region are growing annually: over the past year, 4.5 million tonnes of coal were mined. The industry is developing thanks to the development of the Ogodzhinskoye bituminous coal deposit in the Selemdzhinsky District.

Record harvests in agriculture

Last year, for the first time in the region's history, 2.3 million tonnes of grain and soybeans were harvested. This is 900,000 tonnes more than in 2020.

High results have also been achieved in dairy farming, and we have developed unique government support measures for these enterprises. As a result, three dairy complexes have been built over the past five years, and milk production has increased by 15,000 tonnes.

High results have also been achieved in dairy farming, and we have developed unique government support measures for these enterprises. As a result, three dairy complexes have been built over the past five years, and milk production has increased by 15,000 tonnes.

Over the past five years, soybean processing capacity has grown by almost 30%, reaching 580,000 tonnes per year. But even that is not the limit. In 2026, an oil extraction plant of the Sodruzhestvo group of companies was launched in Belogorsk. It will become the most powerful plant in the Far East and one of the largest in Siberia, with an annual processing capacity of 1 million tonnes of oilseed crops. The enterprise will provide a major boost for the further development of agriculture.

Center for Russian-Chinese Business Cooperation

In Blagoveshchensk, at the initiative of the President of the Russian Federation, a Center of Competence for Russian-Chinese Business Cooperation has been established. It reinforces the

city's status as a federal center for work with China, fulfilling its primary mission — facilitating interaction between Russian and Chinese businesses, assisting in establishing connections and finding partners.

We aim to make Blagoveshchensk Russia's gateway to China. We have unique experience in cooperation with the PRC, a unique geographical position, and a number of major logistics projects: a cross-border cable car across the Amur River, and a combined road and rail bridge between Dzhalinga and Mohe is being planned.

At the end of 2025, the Amur Region again ranked first in the rating of Russian regions for the effectiveness of cooperation with China.

The Amur Region is a land of great opportunities. Today, it opens up new prospects for the implementation of investment projects across a wide range of sectors, for successful careers, and for a comfortable family life.

I am confident that thanks to the Eastern Economic Forum, we will be able to attract additional attention from investors and partners to the Amur Region.

Pavel Puzanov
Deputy Chairman
of the Amur Region Government

**Dear Investors,
Amur Region is ready to meet you and
engage in dialogue. Let this be the first
step toward our future partnership!**

Our regional economy is growing steadily. We place strong emphasis on investment promotion. Our progress is reflected in the results of the National Investment Climate Index survey conducted across all subjects of the Russian Federation.

According to the 2026 results, Amur Region now ranks 11th nationally in the overall rating. In the "Business Protection" category, we entered the top 5. For the sixth consecutive year, the region has remained in the leading group for "Infrastructure Assessment." This year, we secured 2nd place among all Russian regions in that category.

At SPIEF 2026, the region received an award for leadership in the renewable energy investment rating and won the "Investor's Choice" nomination. In recent years, Amur Region has been steadily closing in on the top ten of the National Rating, strengthening its position year after year. We also lead the Far East in investment promotion.

Our region offers significant economic and investment potential. We open vast opportunities for business development, including international ventures. Thanks

to our unique geographic location, we work closely with Chinese authorities and entrepreneurs. Together, we develop and implement projects across multiple sectors, building economic and friendly ties.

In Blagoveshchensk, the Competence Center for Russian-Chinese Business Cooperation was established. The Center provides practical assistance to other regions and businesses, drawing on Amur Region's experience and partnerships with leading Russian experts on China. Demand for the Center is growing, driven by expanding international business relations and tourism infrastructure. We invite other Russian regions to collaborate. The Government of Amur Region has developed proposals for regions to strengthen ties with China using the Center's tools.

We invite private investors to join our professional team. We are all working for the benefit of the region. A comprehensive support system is in place for investment initiatives, including preferential regimes and tax incentives. The regional investment standard has been implemented across all municipalities. Local teams are not only successfully applying these tools in practice but are also continuously enhancing their skills to work even more effectively.

We maintain direct communication channels between businesses and senior regional officials. Investors can reach out with questions through these channels, and each inquiry is addressed promptly.

Regional development institutions provide hands-on support for investment initiatives. They work closely with the Government of Amur Region, as well as various agencies, organizations, and departments. Our shared goal is simple: to remove obstacles from the investor's path and provide maximum support at every stage.

PARTNERSHIP WITH CHINA, AEROSPACE INDUSTRY, AND AGRICULTURAL SECTOR:

Key Focus Areas of the Amur Region Pavilion at the “Far East Street” Exhibition, EEF 2026

Dear Forum Participants and Guests, we are pleased to invite you to visit the Amur Region pavilion!

Our goal is to present the economic and investment potential of the region in a dynamic and creative manner, highlighting its modernity and future-oriented outlook.

The three-level pavilion space combines cutting-edge technologies with contemporary design solutions. Attention to details is paramount. Thanks to a unique die-cutting technique, the facade pattern transforms depending on the light conditions. By day, it produces a striking relief effect. By evening, it emits a soft, warm glow from within.

The ground floor offers an immersive experience of the region's unique geography and culture. Through interactive formats, we highlight Russian-Chinese partnership across logistics, sports, culture, and business cooperation. Also featured here is the World's First Cross-Border Passenger Cableway project (Blagoveshchensk-Heihe), which is scheduled for launch this year.

The second floor is dedicated to the region's flagship industries: agriculture and the space sector. Emphasis is placed on soybeans as a regional brand, grain crops and deep processing of raw materials, as well as the Vostochny Cosmodrome — not merely a launch site, but a federal-level infrastructure project.

An additional pavilion is located adjacent to the main building. This landmark space traditionally represents the Amur Region, showcasing its tourism potential and unique local atmosphere. Notably, an open terrace has been added on its second floor this year, where guests may take a seat, charge their devices, and enjoy the surrounding views.

The third floor is designed as a business communication hub. It includes dedicated areas for negotiations and the signing of agreements with potential partners.

We have retained the popular “Made in the Amur Region” platform, which presents products and souvenirs from our local producers. A stage is also available for a special cultural program, allowing visitors to experience the authentic spirit and atmosphere of our region.

OUR WORK IS THE EFFECTIVE IMPLEMENTATION OF YOUR IDEAS

The Amur Region Investment Promotion Agency was established in 2016 to provide comprehensive professional support for investment projects in the region under the one-stop principle. This December, the regional development institute will celebrate its 10th anniversary. Throughout these years, the Agency has been consistently growing, enhancing its expertise and refining its professional competencies.

KEY FACTS ABOUT THE AMUR REGION INVESTMENT PROMOTION AGENCY

The Agency comprises 5 structural divisions:

Investment Unit

Public-Private Partnership Center

Export Support Center

Innovation Support Center

Center of Competence for Russian-
Chinese Business Cooperation

Total number
of projects supported
over the entire period
of operation

Of these, 31 are public-private
partnership projects.

162
projects

with a total investment
volume of

567.6 billion
rubles

37 Total number
of staff members

investment proposals
and initiatives under
consideration

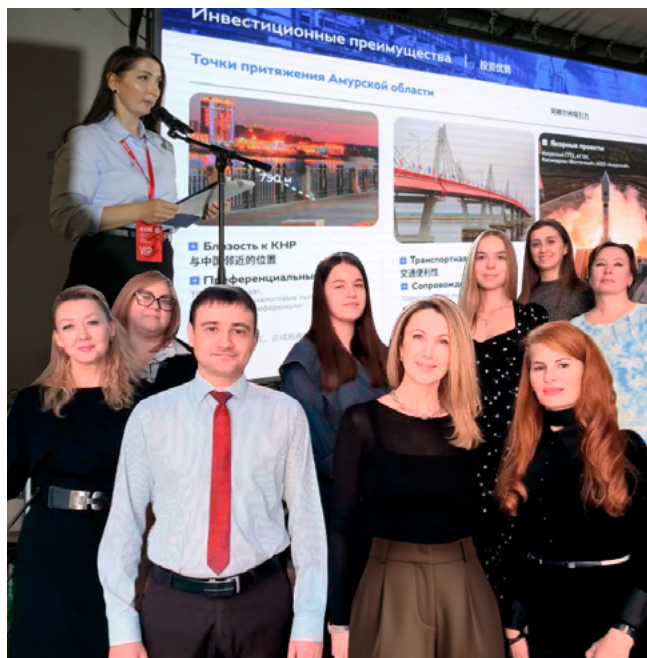

over
60

The Agency provides comprehensive one-stop support for investment projects, including those implemented through public-private partnership mechanisms. It promotes the economic and investment potential of the Amur Region, assists local companies in expanding their export operations, and enables innovators to present and advance their projects. All areas of the Agency's activity represent well-established frameworks designed to achieve strategic objectives and operate with proven efficiency. The portfolio of supported projects is consistently growing.

The Agency's most recently established division is the Center of Competence for Russian-Chinese Business Cooperation.

The Center serves as an aggregator, bringing together service providers and clients across Russia and China. Its operations were launched in the spring of the previous year as part of the implementation of the instruction from the President of the Russian Federation, which designated the

Photo: Amur Region Investment Promotion Agency

city as a federal level center for Russian Chinese business cooperation. Since then, the Center has maintained continuous engagement with entrepreneurs from both countries. Inquiries received primarily relate to consulting services on a wide range of issues, from establishing a legal entity in Russia and China to finding business partners and clients.

With the Center's involvement, a significant number of meetings have been held with foreign entrepreneurs and delegations from abroad. Chinese businesses continue to express strong interest in cooperation with the Amur Region and other Russian regions, exploring sectors where their capital could be effectively deployed. Several companies have already proposed collaboration in specific areas. A number of these initiatives are currently under review by the Agency.

Together with the National Coordination Center for International Business Cooperation, the Agency took part in the opening of the Russian-Chinese Center for Cooperation in Medical Technologies, Products and Equipment and the Center for Product Technical Acceptance in China, both in Shanghai. A similar Center was also opened in Chengdu. This provides extensive opportunities for cooperation between companies of the two countries.

Olga Temchenko

Director of the Amur Region
Investment Promotion Agency
(Autonomous Non-Profit Organisation)

"Over the past ten years, the investment climate in the Amur Region has undergone significant transformation. A key factor has been the implementation of all components of the Regional Investment Standard — a comprehensive set of tools designed to streamline investor engagement, minimise project costs, and accelerate the launch of production facilities. The region offers a broad range of federal and regional support measures, complemented by various preferential regimes.

We would be delighted to cooperate with entrepreneurs seeking to implement an investment project in the Amur Region. We are ready to answer your questions and provide the necessary assistance in preparing documentation, facilitate communication with representatives of government authorities and regional development institutions, help you select a site that meets your requirements and objectives, and support you in accessing available support measures. Our work is the effective implementation of your ideas."

AMUR REGION TRANSPORT AND LOGISTICS CORRIDORS: DEVELOPMENT AND OUTLOOK

Amur Region is actively developing its logistics corridors and upgrading transport infrastructure. It is strengthening our position as a key player in trade and economic relations with Asia-Pacific countries, particularly China. Investment

projects are driving this work systematically and delivering measurable results while adding critical links to the region's transport and logistics network.

CURRENT PROJECTS

CROSS-BORDER ROAD BRIDGE ACROSS THE AMUR RIVER BETWEEN BLAGOVESHCHENSK (RUSSIA) AND HEIHE (CHINA)

The first lorries crossed the bridge on June 10, 2022. Regular year-round passenger bus service began on December 10, 2024.

In 2025 cargo turnover exceeded 500 thousand tons, tourist traffic exceeded 46 thousand people. Compared to 2024, these figures increased by 2.5 times and 2 times, respectively. After the launch of the new border checkpoint, average daily cargo capacity rose from 260 to over 500 vehicles. In the long term, the border crossing is expected to handle up to 2 million people and 315 thousand vehicles annually.

Joint Russian-Chinese investment project. The total length of the international facility is 20 km, of which 6.5 km of roadway are in China and 13.5 km of access roads are in Russia.

Photo: Government of the Amur Region/Svetlana Mitina

"KANIKURGAN" CUSTOMS AND LOGISTICS TERMINAL

Located next to the international road bridge across the Amur River, near Blagoveshchensk (Russia) and Heihe (China), approximately 3 kilometers from the Chinese border. This terminal provides a full range of cargo handling services for foreign trade participants. Goods undergo customs clearance, are repackaged, and are dispatched along their designated routes.

The project was launched in 2023. Terminal capacity continues to grow. It currently handles up to 120 vehicles per day.

BLAGOVESHCHENSK INTERNATIONAL AIRPORT (IGNATYEVO) NAMED AFTER N.N. MURAVYOV-AMURSKY

Located 15 kilometers northwest of Blagoveshchensk and 3.5 kilometers from the Chinese border. A concession agreement for comprehensive airport infrastructure reconstruction was signed in April 2021 between the Regional Government and the investor, "ABS Blagoveshchensk" LLC. The modern passenger terminal was commissioned on March 31, 2026. Russian President Vladimir Putin officially launched its operations.

The new terminal covers over 26 thousand m²— nearly four times larger than the old building. The final phase — reconstruction of the general aviation apron — is currently underway.

BLAGOVESHCHENSK TRADING PORT

Located by the side of the Amur River in close proximity to the Chinese border. Specializes in handling and transporting coal, containers, non-metallic construction materials, timber, packaged goods, and bulk cargo. Also provides passenger and freight services, including a freight ferry crossing between Russian and Chinese ports. The port network includes facilities in Blagoveshchensk and Svobodny — key cities of Amur Region.

Port Capacity: 600 thousand tons per year. Equipped with 8 portal cranes, covered warehouses for various cargo categories, and its own fleet with repair facilities.

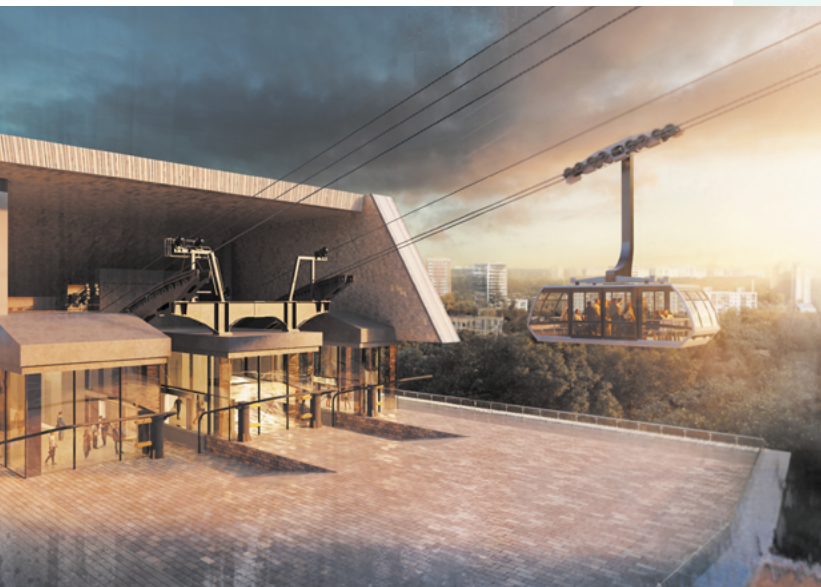

“BLAGOVESHCHENSK DRY PORT” – MULTIFUNCTIONAL RAILWAY TERMINAL COMPLEX

Commissioned in May 2026. Located in the village of Berezovka, Ivanovsky Municipal District. The railway track extends 7.5 kilometers. This is one of the largest logistics railway terminals in the Far East, designed to handle freight traffic between Russia and China via Blagoveshchensk.

Current Capacity of the complex is 520 thousand tons per year, storage capacity: 750 TEU. Dry port is capable of receiving up to two container trains per day. Following modernization by the end of 2026, capacity is expected to reach 1.2 million tons per year with storage for up to 2,000 TEU.

The terminal is equipped with high-tech machinery and specialized loading equipment to enhance operational efficiency, accelerate cargo handling, and ensure transport safety.

Photo: Government of the Amur Region/Svetlana Mitina

PROJECT UNDER CONSTRUCTION

CROSS-BORDER PASSENGER CABLEWAY

This is the world's first cross-border passenger cableway project. It will provide reliable, year-round, comfortable passenger service between Blagoveshchensk and Heihe. Cabins will carry up to 110 passengers each.

The passenger terminal building is over 95% complete.

Capacity: 6,800 passengers per day in each direction or 2.5 million passengers per year in both directions combined. Total length: 973 meters, crossing time of 2.5 minutes.

FUTURE PROJECT

INTERNATIONAL BRIDGE DZHALINDA (RUSSIA) - MOHE (CHINA)

This project is set to become another vital link in Amur Region's logistics network. A combined road and rail bridge is under consideration. Negotiations with the Chinese side are ongoing — covering construction details, cargo base analysis, timelines, and potential investors. An interregional working group has been established.

Primary cargo for rail transport: coal, iron ore, timber, and other commodities. Planned capacity is 20 million tons per year.

HYDROELECTRIC CAPACITY SET TO EXPAND

Hydropower is one of the Amur Region's most promising sectors. The region is already home to three hydroelectric power plants: Zeya (1,330 MW), Bureya (2,010 MW), and Lower Bureya (320 MW).

At an early date, hydropower capacity is expected to grow with the construction of the Lower Zeya HPP, which will have an installed capacity of 400 MW. In 2023, "RusHydro" PJSC began preliminary pre-design survey work, including the development of key technical solutions. The engineering survey program was reviewed and approved.

Core technical and layout solutions for the Lower Zeya HPP have been developed. Field work for engineering-hydrometeorological and engineering-geodetic surveys has been completed. Data processing is currently underway. Project documentation is being developed. Hydraulic and hydropower calculations are being refined.

In the near term, Amur Region plans to build: Solar electric plants with a total capacity of approximately 600 MW in Oktyabrsky District and A wind farm with a capacity of 400 MW in Zavitsinsky District.

A site is being evaluated for another 18 MW station in Blagoveshchensky Municipal District.

HAVE FIELDS TO INVEST IN

INDUSTRIAL COMPLEX FOR LIQUID HYDROGEN PRODUCTION, STORAGE, AND TRANSPORT

25

thousand tons of liquid hydrogen per year

≈ \$170 million

Estimated annual value of products: approximately 170 million US dollars

INDUSTRIAL PRODUCTION

Based on 2025 results, the region's socioeconomic development is assessed as stable. Amur Region's economic growth rates in several indicators exceed the national average.

Gross Regional Product (GRP)
2025 Estimate:

1,110.1 billion rubles

Contribution to GRP:
21%

RUNNING PROJECT

■ TECH HUB DEVELOPMENT

A facility of at least 5,000 m² will be located on a land plot of no less than 1 hectare. This Tech hub must operate for a mandatory term of 10 years. During that period, it will host at least 12 residents, with 80% classified as small and medium-sized enterprises. The project implementation timeline is 3 years. Construction or reconstruction may begin in 2027.

Required Infrastructure Components:

- Real estate assets, including land plots, office buildings, laboratory spaces, and production facilities
- At least two technology facilities necessary for residents to conduct innovation and/or scientific research activities

Project Financing:

Up to 70% of the total budget will be covered by government funding (maximum possible amount: 600 million rubles). The remaining minimum of 30% must be provided by the private investor (management company). This investor will assume sole responsibility for management and control over the implementation of the entire concept.

GAS PROCESSING HUB

Amur Gas Processing Plant (AGPP)

42 billion m³ annual natural gas processing capacity

Production volumes once the plant reaches full capacity:

38 billion m³

purified methane fraction for supplies to the PRC

2.4 million tonnes

of ethane

1.5 million tonnes

of liquefied petroleum gases (LPG)

200 thousand tonnes

of pentane-hexane fraction

60 million m³

of helium

Amur Gas Chemical Complex (AGCC)

design capacity **2.7** million tonnes of products

One of the world's largest facilities for the production of polyethylene and polypropylene.

ONE OF THE PROMISING INDUSTRIES OF THE AMUR REGION IS THE PETROCHEMICAL SECTOR

The sector's growth has been driven by the realisation of large-scale gas projects in the Svobodnensky District, including the construction of the Amur Gas Processing Plant (AGPP) and the Amur Gas Chemical Complex (AGCC).

High-purity liquefied helium from the Amur Gas Processing Plant is already being supplied to the domestic Russian market and exported abroad. The purified methane fraction is delivered to the People's Republic of China. Ethane and liquefied petroleum gases are supplied to the Amur Gas Chemical Complex for further deep processing, with the launch of the complex scheduled for 2026.

The creation of a large-scale gas cluster opens up new prospects for the region in polymer processing, as well as small- and medium-scale chemistry.

Photo: AGPP, AGCC

THE NATURAL GAS VEHICLE FUEL MARKET — A COURSE FOR DEVELOPMENT

In the Amur Region, conditions are being created for the development of a gas refueling infrastructure network. Over the next decade, around 17 gas filling stations are planned to be built in its cities and small towns.

Relevant projects are already being implemented in two locations. In autumn, the first permanent gas filling station will become operational in Svobodny, and by summer 2027 — in Blagoveshchensk. In the meantime, temporary filling stations using mobile gas refuellers are operating in these cities. Alongside the development of gas filling infrastructure, public transport in the region is being converted to cleaner fuel — starting with taxis and road patrol vehicles. In addition, as part of the presidential national project "Infrastructure for Life", 78 buses running on natural gas are to be delivered in 2025-2027 for passenger transportation. Residents of the region who have chosen gas-powered vehicles have been exempted from the transport tax for five years. These preferential terms are available not only to individuals but also to enterprises. Additional support measures are being developed for investors ready to build gas filling stations in the region.

RUNNING PROJECT

PARK IN THE AMUR REGION ADMINISTRATIVE CENTER TO BE TRANSFORMED BY SUMMER 2027

A concession agreement is currently being implemented to renovate the Culture and Leisure Park in Blagoveshchensk. The investor is "Park Blagoveshchensk" LLC, is part of the National Operator of Urban Family Parks. Construction is managed by the Technical Customer, "FSK-R" LLC. The city will gain a renewed public space that will serve as a hub for both residents and tourists.

The park will feature a space theme, with space-futurist architecture and sculptures of characters from the animated feature film "The Mystery of the Third Planet", produced by Soyuzmultfilm studio.

The centerpiece attraction will be a Ferris wheel standing 88 meters tall. From its cabins, visitors will enjoy stunning views of Blagoveshchensk, the Amur River, and the Chinese city of Heihe.

Investment: 3.4 billion rubles

Rendering: "FSK-R" LLC

AMUR REGION:

→ Unique geographic location with Russia's longest border segment with China — about 1,250 kilometers;

→ Beautiful natural landscapes with rich flora and fauna;

→ Unique industrial facilities, including the Vostochny Cosmodrome, hydro-electric power plants, the Amur Gas Processing Plant, gold mining companies, etc.;

→ Unique events and activities, with a strong focus on Russian-Chinese collaboration;

→ The regional capital, Blagoveshchensk, is developing a conceptually new urban space with modern infrastructure, transport corridors, logistics for both cargo and passengers, a year-round events calendar and a Competence Center for Russian-Chinese business cooperation.

SUPPORT MEASURES IN THE REGION

SUPPORT FOR INVESTMENT PROJECTS

- **Financial support**
Assistance in attracting financing from credit institutions and state development institutions for the implementation of investment projects.
- **Organisational support**
One-stop principle support for investment projects

Promotion of the region's investment potential and investment projects
- **Property support**
Provision of a land plot for lease without auction/tender for project implementation
- **Tax benefits and preferences**
- **Investment tax deduction and tax holidays**

INVESTOR SUPPORT MECHANISM

Priority Investment Project (PIP) Mechanism

Provision of subsidies from the regional budget

Reimbursement of costs

(Resolution of the Amur Region Government No. 796 of October 13, 2021)

- 2/3** Reimbursement of 2/3 of the key rate on interest payments on loans, but not exceeding 50 million rubles.
- 70%** Reimbursement of 70% of the costs of purchasing technically sound equipment and vehicles, including delivery and installation, but not exceeding 50 million rubles.
- 25%** Reimbursement of 25% of capital investments in capital construction facilities, construction and installation works, and reconstruction, but not exceeding 100 million rubles.
- 50%** Reimbursement of 50% of the initial lease payment under a leasing agreement for the acquisition of new equipment and vehicles, but not exceeding 50 million rubles.
- 50%** Reimbursement of 50% of the costs of purchasing new Russian-made equipment and vehicles, including delivery and installation in the Amur Region, but not exceeding 80 million rubles.
- 99%** Reimbursement of 99% of costs incurred in the event of force majeure circumstances — interest payments on loans and leasing agreements, but not exceeding 50 million rubles.

Reimbursement of part of the costs

(Resolution of the Amur Region Government No. 423 of July 1, 2021)

- 70%** Reimbursement of 70% of the costs incurred in connection with the connection of facilities to electrical grids and engineering infrastructure networks, but not exceeding 80 million rubles and not more than 20% of the actual capital investments made in the project.

Major Investment Project (MIP) Mechanism

Without auction/tender

Provision of land plots for lease without holding auctions/tenders

- 98%** A 98% rent reduction benefit for land plots provided for the implementation of Major Investment Project.

REGIONAL DEVELOPMENT INSTITUTIONS OF THE AMUR REGION

Photo source: "My Business" Center

"MY BUSINESS" CENTER

Modern system of instruments of state support of business of the Amur Region. The range of services is diverse and includes search of business ideas, consulting, execution of documentation and provision of support measures for entrepreneurs.

The structure of the Center includes:

→ CENTER FOR CREDIT SUPPORT OF ENTREPRENEURSHIP

Provides entrepreneurs of the Amur Region with preferential microloans at reduced rates for the purpose of creating and developing a business. The work is aimed at developing the region and its entrepreneurs, and also involves promoting Amur brands, expanding the range of goods and services, and improving the quality of products.

-  ckpp28@mail.ru

→ Regional guarantee organization – FUND FOR ASSISTANCE TO LENDING TO SMALL AND MEDIUM-SIZED BUSINESSES OF THE AMUR REGION.

Provides guarantees for the obligations of small and medium-sized businesses and self-employed citizens under agreements (credit, loan, lease, bank guarantee), simplifying the procedure for obtaining loan financing necessary for opening and developing a business.

→ ENTREPRENEURSHIP SUPPORT CENTER

Creates favorable conditions for the development of small and medium businesses, providing financial, marketing, informational and legal support for the activities of Amur businesses, organizing and holding seminars, trainings, master classes and forums.

→ CLUSTER DEVELOPMENT CENTER

Creates conditions for effective interaction between enterprises participating in territorial clusters, educational and scientific institutions, non-profit and public organizations, state and local government bodies, as well as investors in the interests of territorial cluster development and to ensure the implementation of joint cluster projects.

AMUR FAR EAST AND THE ARCTIC DEVELOPMENT CORPORATION

"Amur Region Far East and the Arctic Development Corporation" LLC is a subsidiary of the Corporation for the Development of the Far East and the Arctic — a state institution for the socio-economic development of the Far East and the Arctic, subordinate to the Ministry for the Development of the Russian Far East.

It directly interacts with potential investors, supports the activities of residents, helps them obtain the status of a resident of an Advanced Special Economic Zone (ASEZ), and provides assistance in preparing applications and selecting land plots. It also monitors project implementation, providing comprehensive support as a one-stop shop, and offers residents all-round assistance, serving as the single center for services and support from the Far East and Arctic Development Corporation (FEDC) in resolving any issues that arise.

10 REASONS TO CHOOSE OUR REGION FOR INVESTMENT

01 UNIQUE GEOGRAPHY

Of all the regions of Russia, the Amur Region has the longest border with China – about 1250 km. It is located close to the countries of the Asia-Pacific region.

02 INVESTORS SUPPORT MEASURES

In the Amur Region, there are measures to support investors, including the preferential regime of the Advanced Special Economic Zone.

03

ACTIVE DEVELOPMENT OF THE ECONOMY

Over the past five years, our region has been breaking historical records in attracting investment. The greatest interest among investors is generated by traditional sectors of the region's economy – agriculture and mining, as well as new ones that have been actively developed in recent years – gas chemistry, gas processing and logistics.

04 NATURAL RESOURCES AND SOURCES OF RAW MATERIALS

The region is rich in raw materials and natural resources. Its subsoil contains gold, copper, nickel, coal and many other minerals. And its rivers are a powerful source of energy. There are three hydroelectric power stations operating on them, and there are plans to build another one.

05 DEVELOPED INFRASTRUCTURE

The region has an active and developing infrastructure – transport and logistics, engineering, IT and social. A gas pipeline and an oil pipeline pass through its territory. New transport and logistics corridors are being formed.

06

REGION IS A RELIABLE PARTNER

Interacting with investors in various areas, the region has a reputation as a reliable partner. The successful implementation of projects is evidenced by the production facilities operating today.

07

EDUCATIONAL INSTITUTES

The region has a developed network of educational and scientific institutions, which allows solving the personnel issue. The regional government pays special attention to it.

08

IMPLEMENTATION OF INVESTMENT STANDARD

The Investment Standard has been implemented in the region. This is a system for protecting investment projects, designed to help implement initiatives – from the idea to the start of production.

09 INVESTMENT PROPOSALS

Investment proposals have been formed, in various areas and with different levels of required investment. Investors are given the opportunity to choose sites, including those with the connection of networks and communications.

10 PROFESSIONAL PROJECT SUPPORT

A professional team helps in supporting investment projects. Our specialists constantly improve their qualifications, study new practices and experience of other regions in order to fully apply the existing arsenal to attract investors and support investment projects

FRIENDSHIP WITHOUT BORDERS

The two banks of the Amur River, separated by just 750 meters, between Blagoveshchensk, Russia, and Heihe, China, are linked not only by economics but also by culture, art, and sports. This is clearly demonstrated by the now-traditional events aimed at strengthening relations and developing friendly ties between Russia and China. These include:

Russian-Chinese Culture and Arts Fair

International Russian-Chinese Gastronomic Festival "Riversides of Taste"

International Russian-Chinese Friendly Football Competition for Children

International Russian-Chinese Winter Sports Festival

"AMUREXPO" — OFF-SITE VENUE OF THE EASTERN ECONOMIC FORUM (EEF)

AmurExpo is an annual economic forum that has established itself as a key gathering point for the business community. It takes place simultaneously in Blagoveshchensk, the administrative centre of the Amur Region, and Heihe in China's Heilongjiang Province, attracting government officials, investors, entrepreneurs and exporters from Russia and beyond. The forum's agenda features a rich line up of sessions, roundtables and exhibitions, offering a dynamic space for generating new business ideas, sharing best practices, and sealing win win partnerships between investors, business and the public sector.

Igor Pavlov

First Deputy Director of the
Roscongress Foundation, Director of
the Eastern Economic Forum (EEF).

"During the days of the Russian-Chinese Economic Forum AmurExpo-2026, Blagoveshchensk became a bridge between Russia and China, clearly demonstrating the unique opportunities of the Far East and its potential for the comprehensive development of relations between our countries, particularly in the areas of economic and humanitarian cooperation. The AmurExpo covered all key issues concerning the further development of the macro-region. The Roscongress Foundation highly appreciates the results of AmurExpo, which for the fourth time has served as an off-site platform of the Eastern Economic Forum. AmurExpo has rightfully become the flagship event of the Far East in the core areas of Russia's cooperation with China and other Asian countries."

AmurExpo is organised by the Government of the Amur Region and the Amur Region Investment Promotion Agency. In 2026, AmurExpo was held on 21-24 May and marked the fourth consecutive year that the forum has been supported by the Roscongress Foundation. Following a directive from the President of the Russian Federation, the forum has been granted the status of an off site venue of the Eastern Economic Forum.

Over the four days of AmurExpo, 71 sessions at the regional and federal levels were held, along with over 100 specialized events. The discussion agenda covered strategic topics: territorial development, logistics, the tourism industry, the creative economy, and digitalization. The composition and geographic diversity of the participants demonstrated strong international interest: the forum was attended by more than 500 experts and delegates from the Russian Federation, the People's Republic of China, the Republic of Belarus, and Kazakhstan. Among them were representatives of federal ministries (the Ministry for the Development of the Russian Far East and Arctic, the Ministry of Foreign Affairs, the Ministry of Economic Development), the Federation Council, the State Duma, diplomats from the PRC, regional authorities, business communities, and experts. The exhibition featured 89 participating companies, of which 12 were from the PRC and 77 were Russian.

The key event of the forum was the plenary session "The Amur Corridor to the Future: Russia and China – From Good-Neighborliness to Shared Growth," which focused on the successes already achieved. In 2025, the trade turnover between the macro-region and China increased by 45%, while passenger traffic grew by 16%, and a number of joint logistics, social, and cultural projects have been implemented.

For the first time at the forum venue, experts from Russia and China held a detailed discussion on e-commerce as a "gateway to the trade of the future." The discussions covered cross-border digital payments, the new requirements of banks in the Russian Federation and the PRC, the prospects of the digital yuan and the digital ruble, as well as secure routes for international settlements.

At the AmurExpo 2026 forum, the booth of the Russian Ministry for the Development of the Russian Far East and Arctic and the Far East and Arctic Development Corporation brought together more than 2,700 entrepreneurs from the Russian Federation and the PRC. The focus was on the opportunities offered by territories of advanced development, including international ones. Over 200 potential investors received personalized recommendations on launching projects using government support measures.

Off-site events were held in Heihe, where a presentation of the economic and investment potential of the Amur Region took place, as well as in Harbin. The Competence Center for Russian-Chinese Business Cooperation organized a master class addressing issues related to the effective entry of Chinese companies into the Russian market in the context of the digital

transformation of the economy and the tightening of localization requirements.

Another noteworthy event held within the framework of AmurExpo was the Russian-Chinese Industrial Tourism Forum "Open Industry," which brought together representatives from over 40 regions to exchange practical experience in the field.

The cultural and sports program of the forum serves as an effective instrument of people's diplomacy and the promotion of the regional brand. The four-day festival, encompassing traditional crafts, gastronomy, and sports, acquired an international dimension this year through the participation of Chinese bloggers. For the first time, a live broadcast was conducted from the rooftop of the House of Russian-Chinese Friendship, lasting four hours, which enabled the presentation of Russian products to a multi-million audience in China via an online trade format, thereby creating new channels for export sales.

During the live stream, a broad range of Russian products was presented to viewers, including confectionery goods, waffles, honey, butter and soybean oil, kvass, flour, and chocolate. The broadcast featured 17 companies from 13 regions of the Russian Federation. The live stream attracted an audience of 113,000 viewers, while the total reach of the broadcast amounted to 990,000 impressions.

Vasily Orlov

Governor of the Amur Region

"The primary objective of AmurExpo is the development of Russian-Chinese relations. For us, China is a strategic partner. The Amur Region and Heilongjiang Province, as well as the cities of Blagoveshchensk and Heihe, have been entrusted with an additional mission — to serve as frontrunners in fostering these relations. We have a unique geographical position and have accumulated unique experience. This is precisely why the President of Russia made the decision to establish a federal-level Center for Russian-Chinese Business Cooperation in Blagoveshchensk. The holding of the forum is an important component of this work. We annually note an increase in the level of representatives participating in AmurExpo. This year, an off-site meeting of the Federation Council committee and a roundtable of the State Duma Committee for the Development of the Far East and the Arctic were held. We are confident that the decisions discussed at the forum will be considered at the federal level."

Yuriy Trutnev

Plenipotentiary Representative of
the Russian Federation President in
the Far Eastern Federal District.

"We are committed to the development of mutually beneficial cooperation with friendly countries across various sectors. The leaders of our two states have reached agreements at the highest level on strengthening Russia's interaction with our neighbor. The Russian-Chinese Economic Forum AmurExpo serves as one of the platforms for discussing opportunities to enhance the partnership ties between our countries and demonstrates the tangible results of this collaborative effort."

The history of AmurExpo (12+) spans more than 30 years. It was first held in Blagoveshchensk in 1992 in the format of an international fair.

Each year, the forum gains momentum, with an increasing number of participants and events. The platform offers opportunities for finding partners, investors, and suppliers, and provides a venue for discussing economic issues and new initiatives, obtaining information on key projects of Russian-Chinese cooperation, prospects for trade and logistics development, familiarizing oneself with the products and services of Russian and Chinese manufacturers, and participating in B2B negotiations with businesses across various industries.
